Change quickly now for quick change!

Upgrade KL-S with X-LIFT quick change system

Use the X-LIFT benefits of the Wangen KL-S* pumps.

- Simpler and quicker maintenance for your Wangen pumps
- No more disassembly of pipeline required - vertical extension possible!!
- Rotor and stator can be exchanged as a package
- Less time needed for pump to return to operation
- No changes to installation lengths!

X-LIFT change action:

If you purchase a ROTOR-STATOR SET, you'll receive a free X-LIFT discharge flange!

The X-Lift set contains:

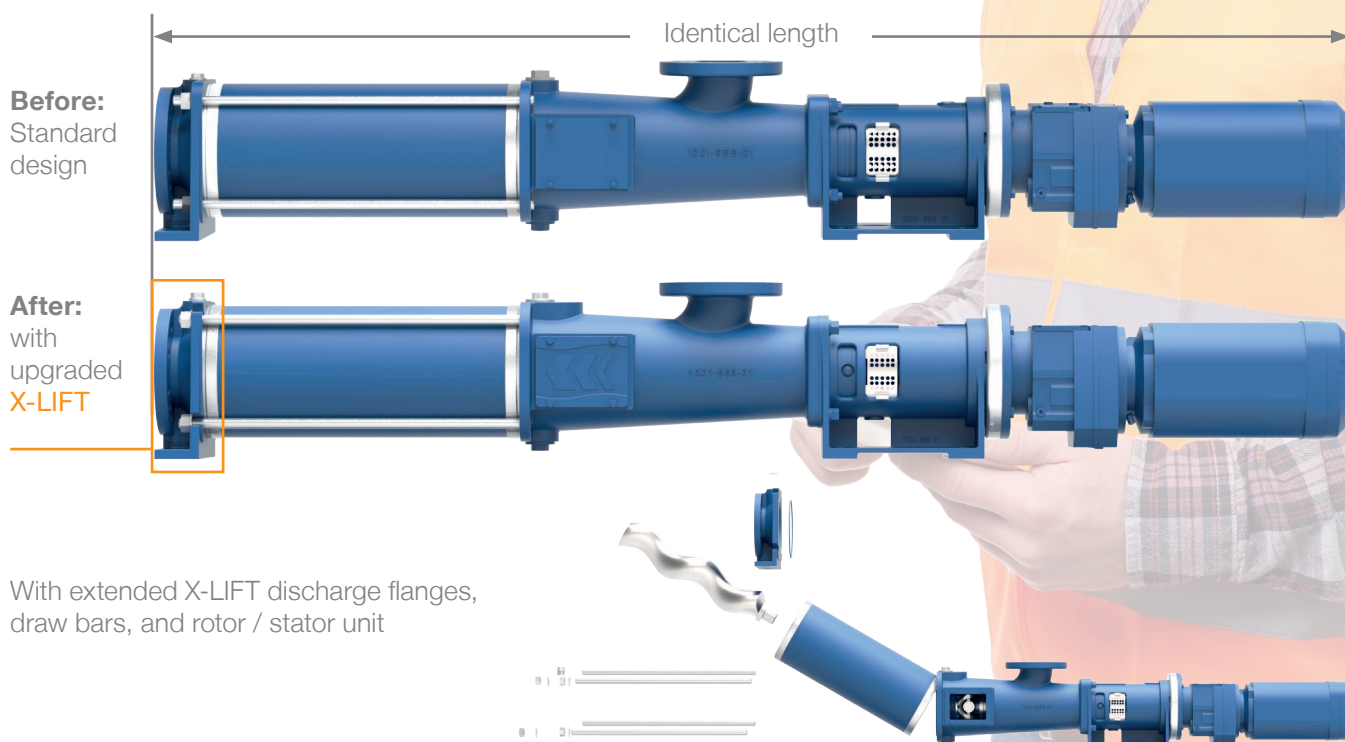

- X-Lift discharge flange
- X-Lift connection bolts (incl. locking screws)

Available as an option:

- Mounting tripod (makes assembling and removing the rotor / stator package easier)
- Chain hoist (for joining and separating the rotor and stator safely)
- Rotor head adaptor / disassembly aid (makes separating the rotor from the stator simpler)

*all WANGEN KLS pumps with inspection opening on the suction housing

Example of length comparison: KL50-S standard and with X-LIFT

With extended X-LIFT discharge flanges, draw bars, and rotor / stator unit
